Harvard GSD selects Herzog & de Meuron, Beyer Blinder Belle for transformative expansion of School's Gund Hall. Project designed to advance School's commitment to cross-disciplinary collaboration and innovation Harvard University Graduate School of Design

Harvard Graduate School of Design

Architecture is both the process and the product of planning, designing, and constructing buildings or any other structures. Architectural works, in the material form of buildings, are often perceived as cultural symbols and as works of art. Historical civilizations are often identified with their surviving architectural achievements.

Software Architecture typically refers to the bigger structures of a software system, and it deals with how multiple software processes cooperate to carry out their tasks. Software Design refers to the smaller structures and it deals with the internal design of a single software process. By the end ...

Software Architecture and Design Tutorial

This article discusses the highlights of service-oriented modeling and architecture; the key activities that you need for the analysis and design required to build a Service-Oriented Architecture (SOA). The author stresses the importance of addressing the techniques required for the identification, specification and realization of services, their flows and composition, as well as the ...
