

cockatiels for dummies pdf

The crest is a prominent feature exhibited by several bird and other dinosaur species on their heads.. The crest is made up of semiplume feathers: a long rachis with barbs on either side. These are plumulaceous feathers, meaning that they are soft and bendable. In birds, these semiplumes are common along the head, neck, and upper back, and may be used for buoyancy and sensing vibrations.

Crest (feathers) - Wikipedia
