Foundational Software for Functional Safety - TI.com

Verification and validation are independent procedures that are used together for checking that a product, service, or system meets requirements and specifications and that it fulfills its intended purpose. These are critical components of a quality management system such as ISO 9000. The words "verification" and "validation" are sometimes preceded with "independent", indicating that the ...

Questa CDC is the industryâ€™s most comprehensive and easy-to-use clock-domain crossing verification solution

Questa CDC Verification - Mentor Graphics

In computer science, functional programming is a programming paradigmâ€™a style of building the structure and elements of computer programsâ€™that treats computation as the evaluation of mathematical functions and avoids changing-state and mutable data. It is a declarative programming paradigm, which means programming is done with expressions or declarations instead of statements.
