Researchers typically express the confidence in their data in terms of p-value: the probability that a perceived result is actually the result of random variation. The value of p (for â€œprobabilityâ€•) is a way of measuring the extent to which a data set provides evidence against a so-called null hypothesis. By convention, a p-value below 0.05 is considered a meaningful refutation of the null ...

William DeFoore, an anger management writer, described anger as a pressure cooker: we can only apply pressure against our anger for a certain amount of time until it explodes.. One simple dichotomy of anger expression is passive anger versus aggressive anger versus assertive anger. These three types of anger have some characteristic symptoms: [citation needed]
