Most of this material is identical Fri, 07 Dec 2018 12:54:00 GMT Chapter 2 Review of Forces and Moments - Sir Isaac Newton described the motion of all objects using the concepts of inertia and force, and in doing so he found they obey certain conservation laws. In 1687, Newton published his thesis *Philosophiæ Naturalis Principia Mathematica*. In this work Newton set out three laws of motion that to this day are the way forces are described in physics. Sat, 08 Dec 2018 21:43:00 GMT Force - Wikipedia - Inertia is the resistance, of any physical object, to any change in its velocity. This includes changes to the object's speed, or direction of motion.. An aspect of this property is the tendency of objects to keep moving in a straight line at a constant speed, when no forces are upon them”and this aspect in particular is
