In 2001, the Federative Committee on Anatomical Terminology accepted female prostate as an accurate term for the Skene's gland, which is believed to be found in the G-spot area along the walls of the urethra. The male prostate is biologically homologous to the Skene's gland; it has been unofficially called the male G-spot because it can also be used as an erogenous zone.

The location of the Skene's glands are the general area of the vulva, located on the anterior wall of the vagina around the lower end of the urethra. The Skene's glands are homologous with the prostate gland in males, containing numerous microanatomical structures in common with the prostate gland, such as secretory cells. Skene's glands are not, however, explicit prostate glands themselves.
