In mathematics, physics, and engineering, a Euclidean vector (sometimes called a geometric or spatial vector, or "as here" simply a vector) is a geometric object that has magnitude (or length) and direction. Vectors can be added to other vectors according to vector algebra. A Euclidean vector is frequently represented by a line segment with a definite direction, or graphically as an arrow ...

Flightlab Ground School 9. Rolling Dynamics

Flight dynamics is the science of air vehicle orientation and control in three dimensions. The three critical flight dynamics parameters are the angles of rotation in three dimensions about the vehicle's center of mass, known as pitch, roll and yaw.. Aerospace engineers develop control systems for a vehicle's orientation (attitude) about its center of mass.

Preface Striking developments have taken place since 1980 in feedback control theory. The subject has become both more rigorous and more applicable.

Feedback Control Theory

The Toolkit's unprecedented level of control is accomplished with a concise and compact API. A handful of functions provide the functionality which usually requires hundreds.

Modern Homing Missile Guidance Theory and Techniques

Modern Robotics is written at the system level: you learn about the kinematics, dynamics, motion planning, and control of an entire robot system. If you would like to learn more about the details of implementation, e.g., joint-level feedback control, driving motors (including brushed, brushless, steppers, and servos), gearing, sensors, signal processing, etc., check out Embedded Computing and ...

This Specialization provides a rigorous treatment of spatial motion and the dynamics of rigid bodies, employing representations from modern screw theory and the product of exponentials formula.

Modern Robotics, Course 3: Robot Dynamics | Coursera

This book presents a unified treatment of many different kinds of planning algorithms. The subject lies at the crossroads between robotics, control theory, artificial intelligence, algorithms, and computer graphics.
